## Manual QA

I am a passionate and restless QA Manual with experience in National and International projects. In the same work, under Agile Methodologies, SCRUM specifically, validating and certifying Software Quality. My experience includes creating and executing test cases, reporting bugs and test results, as well as Integration, Retest, Regression, Smoke and UAT tests. I use Jira as Project Manager, Postman for testing with APIs and Devtools for visual testing.

I consider myself a person with good communication skills, teamwork and constant collaboration. I always look for innovation and good practices to be able to give my best in the challenges that I participate in.

## Experience

○ **Dic 2022 - Actualidad**  
Freelance Tester Argentina y EEUU

### QA Manual

I am currently collaborating with a team in the US on an Ecommerce project and in Argentina on an institutional project, performing the following tasks:

- Certification of functional tests such as accessibility, look and feel, usability and APIs with Postman.
- Requirements analysis, effort estimates and joint tests with the development area.
- Creation of test plans.
- Execution of test cases and evidence gathering.
- Registration, monitoring and retesting of bugs.
- Plan and perform integration, regression, smoke, exploratory tests and provide support in acceptance tests (UAT)
- Documentation of evidence.
- Constant interaction with the different areas involved in the project.
- Detect and communicate opportunities for improvement.

## Education
